Bacterial Speck and Spot				Cungfu / Proxan			

Very important: Where water quality problems are being experienced, the addition of Bladbuff 5 is recommended. Consult your Plaaskem representative for guidelines on the correct usage of adjuvants. The above information is a guideline for ideal time of application but environmental conditions, appearance of pests and disease, cultivar differences and time of plant will cause differences. Consult the label of the above products for detailed application details.

Above products are all registered products of Plaaskem (Pty) Ltd according to the requirements of Act No. 36 of 1947.
