

## FOLIAR FEEDING PROGRAMME FOR POTATOES

Growth Stage	Product	Rate / ha	Comments
Week 2	MaxiBoost Multifeed	2lt 4kg	
Week 4	Alexin MaxiBoost Multifeed P Zincmax	2.5lt 2lt 4kg 1lt	If Zinc deficiency is known, then at least 1 or preferably 2 application of <b>Zincmax</b> at 1lt / ha should be applied (Extremely acid, highly leached or alkaline soils).
Week 5	CalciMax	3lt	If high temperatures occur during the growth season, the application of <b>Calcimax</b> will improve heat tolerance.
Week 6	Alexin DoubleMax	2.5lt 4lt	
Week 8	DoubleMax Zincmax	4lt 1lt	
Week 10	Alexin DoubleMax Zincmax	2.5lt 2lt 1lt	
Week 12 - 16	K-Max, Magmax Supafeed	10lt, 3lt 4 - 8kg	Apply <b>K-Max</b> and <b>Magmax</b> as of the beginning of bulking-up, followed by a further 2 - 3 applications at 10 - 14 day intervals.

Note: Decrease the foliar application rate accordingly, when it is applied to an entire row.
