

FOLIAR FEEDING PROGRAMME FOR POTATOES

Growth Stage	Product	Rate / ha	Comments
Week 2	MaxiBoost Multifeed	2lt 4kg	
Week 4	MaxiBoost Multifeed P Zincmax	2lt 4kg 1lt	If Zinc deficiency is known, then at least 1 or preferably 2 application of Zincmax at 1lt / ha should be applied (Extremely acid, highly leached or alkaline soils).
Week 5	CalciMax	3lt	If high temperatures occur during the growth season, the application of Calcimax will improve heat tolerance.
Week 6	DoubleMax	4lt	
Week 8	DoubleMax Zincmax	4lt 1lt	
Week 10	DoubleMax Zincmax	2lt 10lt	
Week 12 - 16	K-Max, Magmax Supafeed	10lt, 3lt 4 - 8kg	Apply K-Max and Magmax as of the beginning of bulking-up, followed by a further 2 - 3 applications at 10 - 14 day intervals.

Note: Decrease the foliar application rate accordingly, when it is applied to an entire row.
